

**Data Analyst/ BI Developer****Location: Exeter /Newton Abbot /Sidmouth****Salary: £35,229 to £38,052 per annum****37 hours per week****Permanent****About Strata**

Strata is an established IT company with over 70 employees based throughout its Head Office in Exeter and other sites in Newton Abbot and Sidmouth.

Strata has invested heavily in hardware and software delivery platforms and is now proud to offer its local government customers some of the latest technology around virtualisation, application delivery and mobile working.

**About the Role**

We are looking for an experienced Data Analyst/ BI Developer to join our Business Intelligence Unit. The role will be responsible for:

- creating and maintaining a data warehouse of internal and third party datasets, optimised for efficient reporting and gaining business insight.
- creating corporate dashboards showing operational data and strategic business insight to support business decision making.
- working closely with internal and external customers to offer advice and training, to empower end users to develop their own reports.
- Assisting other member of the Business Intelligence Unit to support the corporate address database as required.

To be effective in the role you should have working knowledge and experience of the following:

- a variety of Business Intelligence Tools, such as SQL Server Integration Services and SQL Server Analytical Services to produce, maintain and report on corporate databases and the Data Warehouse
- a variety of reporting tools such as Power BI, SQL Server Reporting Services and Business Objects to produce reports and dashboards to a range of end users, to assist with service delivery and strategic decision making
- a range of data analytics software such as 'R', Python, SPSS, Advanced Excel and SQL Server to analyse data for inclusion in corporate reports and dashboards
- Understanding of statistical methodologies and data analysis techniques.

The role will require you to form good working relationships with our customers and suppliers, to understand their requirements and work with them during and after implementation of any solutions.

Strata are strong believers in investing in training and skills for our staff and provide access to a range of on-line training courses as well as specialised trainer-led courses on a wide variety of technical and soft skills. The role also offers a generous pension scheme and holiday entitlement.

This role can be based at either Exeter, Newton Abbot or Sidmouth and will be agreed with the successful candidate. Our Exeter office is located in the city centre and ideally situated for shops and restaurants and all public transport connections. Alternatively our offices in Newton Abbott are easily accessible just off the A380 and parking is available. We also offer a cycle to work scheme.

**About You**

You'll be an experienced Data Analyst/ BI Developer specialising in working with data using a variety of industry standard tools to leverage business insight. You will have exceptional communication skills with the ability to communicate complex ideas to a range of stakeholders in an understandable way.

A driving licence and own transport is essential (although reasonable adjustments may be possible) as you will be required to travel regularly to attend meetings at our other sites.

**Apply**
